

GDS Series Facility Access Solutions

About the GDS Series

Our GDS series is built for business that require facility access and a video surveillance solution for buildings of all sizes. With Grandstream's facility access systems, users can easily track and manage access to any building, can communicate with outside visitors thanks to its intercom capabilities and even obtain a live video feed straight to their work station. The GDS series is an integrated solution that can be customized to fit each deployment and its varying needs.

Product Positioning

Whether it be a video surveillance solution or an audio-only intercom access solution, our GDS series from Grandstream provides options for various deployments. Perfect for residential and commercial areas that not only need to be monitored but also require facility access. Integration with other Grandstream endpoints turn the GDS series into a complete intercom, facility access and video surveillance solution.
